

## YAKIMA PARK & RECREATION DOG PARK RE-OPENING PROTOCOLS

### OVERVIEW

Parks and Recreation staff are in the process of re-opening the Randall Park Dog Park in accordance with the Safe Start Yakima County plan. First and foremost, the safety of our families and staff is our highest priority.

We will be implementing the protocols included in this plan with approval from the Yakima Health District and the Governor's Office. We ask that all dog park visitors follow the protocols in order to be allowed to keep our dog park open. The identified measures have been determined by the CDC and utilized throughout the country. Due to the unpredictability of COVID-19, operational interruptions may be unavoidable this time. We ask for your patience and cooperation as we go through this period of time together. **All dog park facilities will be washed with a pressure washer using hot water and soap prior to opening.**

Please enjoy your dog park while following these rules to ensure that the dog park can remain open, clean, and safe during this public health emergency.

### IF YOU CHOOSE TO VISIT RANDALL PARK DOG PARK

- ***Wear a mask, except for children under age 2***
- ***Wash hands often with soap and water for at least 20 seconds, especially after going to the bathroom, before eating, and after blowing your nose, coughing, or sneezing.***
- ***Use hand sanitizer that contains at least 60% alcohol and rub hands together until dry, if soap and water are not readily available.***
- ***Stay home if you are sick.***
- ***If you are sick with or tested positive for COVID-19, were recently exposed (within 14 days) to someone with COVID-19, or just don't feel well, do not visit public areas including parks or recreational facilities.***
- ***Maintain a distance of at least 6 feet away from people you don't live with.***
- ***Cover coughs and sneezes with a disposable tissue or cough and sneeze into the elbow rather than hands, and throw tissues away after use; wash or sanitize hands after coughing or sneezing***

***Outdoor areas generally require normal routine cleaning and do not require disinfection. Spraying disinfectant on sidewalks and in parks is not an efficient use of disinfectant supplies and has not been proven to reduce the risk of COVID-19 to the public.***
